their participation in the course.

3 Courses

Introduction to
Semiconductor Packaging

Semiconductor Packaging
Manufacturing

Advanced Semiconductor
Packaging

Oct 22, 2024

Kiran Patil

has successfully completed the online, non-credit Specialization

Semiconductor Packaging

Microelectronics enable all aspects of our daily lives (across consumer products, automotive, communication, computer, medical, agriculture), and must all be housed in secure packages. This specialization, jointly developed by ASU and Intel, provides a foundational understanding of what Semiconductor Packaging is, how packaging is designed and made, and how it works to finish, connect and protect functional parts.

Terry Alford, Professor,
School for Engineering
of Matter, Transport
and Energy

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
